NOTE: What you see here are screenshots from ArcPad running on a PC computer. Unfortunately what you see is not what you get (WYSINWYG) with ArcPad desktop and ArcPad IPAQ. Boxes and Text labels may be out of place and/or missing in these screenshots.

First Screen the user sees when opening the ArcPad Project. These data are stored as Global Variables and are placed in each of the three tables automatically if/when a point is taken.
Currently Available tools (subject to change). Note the Switchpage (book) button. This brings up the editing options page shown below. The circle, diamond, triangle symbols are the current symbology used for the three data forms (subject to change).
